

# Phalaenopsis Care Checklist

WRITTEN BY  
**Homi Botanical**

# Are you starting Phal.? Awesome!

## Light:

- Bright, indirect light
- Gentle morning sun (avoid harsh noon sun)

## Water (only when needed)

- Water when roots look silvery + pot feels light
- Soak 10-15 min → drain fully
- No water left in saucer/outer pot; keep crown dry

## Quick check

- Roots: green = ok / mushy brown = rot risk
- Leaves: firm = ok / wrinkled = thirsty or root issue
- Pests: sticky/cotton/webbing = treat & isolate

## Routine

- Weekly: rotate + wipe leaves
- Monthly: light fertilizer + flush

Notes Last watered: \_\_\_\_ / \_\_\_\_
